# The Company

---

The company is one of the world's finest banks situated on the east coast of the United States. It is a Fortune 500 companies delivering retail banking, investment banking and wealth management.

# The Challenge

A Top US bank with a huge and federated IT structure wanted to adopt agile and DevOps practices to gain real business value enabling faster feature releases, better service quality and cost optimization. This was part of an annual exercise realized to align integrated DevOps practices and deliver defined and structured outcomes.

## The Solution

ACI Infotech undertook and created a Agile & DevOps Maturity Assessment and Transformation Roadmap. ACI Infotech leveraged the core team to deliver a solution that transformed people, process, and technology, consisting of

Processes like maturity assessment, transformation roadmap creation, implementing Scrum & Kanban

People enablement through coaching and reorganizing transforming to agile pods

Orchestration of various DevOps practices deploying a variety of tools and establishing the CI/CD pipelines

## The Benefits

The customer achieved savings of US \$2 million and enhanced quality with

---

Improved service quality and reliability  
by almost **25%**

---

Reduced release cycle time from over **12**  
WEEKS TO **3-4** weeks

---

Dedicated Agile coaching for teams throughout lines  
of businesses

# About ACI Infotech

ACI Infotech, an end-to-end IT services organization, is a worldwide technology accelerator that enables businesses expedite their digital transformation journeys and become more agile, data-driven, and digital-ready.

Founded in 2006, ACI Infotech is currently present in more than 35 markets across the United States and worldwide. The company helps global clients leverage a wide range of service offerings, including digital and data transformation, analytics, customer experience strategies, cloud platform offerings, workplace & mobility, enterprise & cloud apps, AI, business process services, and cybersecurity, through its highly specialized consultants in groundbreaking technologies and industry professionals.

ACI's high-tech platform accelerators, custom tech platforms, and consultative methodology help clients streamline business processes, establish and run more dynamic organizations, and deliver unparalleled levels of performance and customer satisfaction.

# Thank You!
